## “Tuple” class

- by Harsha Vardhan

### “Tuple” Class

- Tuple is a group of values of different data types.
- Tuple can store values from 1 to 8.
- It is mainly used to return multiple values from a method, without using “out” parameter.
- It can also store duplicate elements.

#### Tuple

```
Tuple<DataType1, DataType2, ...> referenceVariable =  
new Tuple<DataType1, DataType, ...> property = value, property = value, ... }
```
