Local Functions

- by Harsha Vardhan

Local Functions

- "Local functions" are functions, to do some small process, which is written inside a method.
- Local functions are not part of the class; they can't be called directly through reference variable.
- Local functions don't support "access modifiers" and "modifiers".
- Local functions support parameters, return.

Local Function [Inside a method]

```
public void MethodName(param1, param2, ...)
{

    LocalFunctionName();  //Calling the Local Function

    ReturnDataType LocalFunctionName(param1, param2, ...)
    {
        //Local Function Body Here
    }
}
```
